

## **Vessels – Pipes – Assembly** **Cost-effective Package Solutions by BUTTING Anlagenbau**

In 1991 BUTTING Anlagenbau was set up as a servicing company, providing maintenance for the local paper industry in the Schwedt area. Today, less than twenty years later, around 300 staff work there to implement individual solutions concerned with vessel construction.

“The basic principle of our success“, says Managing Director Markus Bartsch, “is to be a just a little bit better tomorrow than we are today.“ To continue following this idea in the future, and thus to do justice to the developing demands of our customers, last year we expanded our manufacturing capacities.

As a result of a large number of extensions to the production halls and the manufacturing facilities for vessel and pipe construction, we can now offer customized, cost-effective, state-of-the-art package solutions on a covered area of more than 15,000 m<sup>2</sup>.

Our all-round service for this includes not only the manufacturing of vessels and pipes. Expert advice and planning by our very experienced staff, along with on-site installation are part of what we understand by good service. We place particular emphasis on a close cooperation with our customers, so as to lay solid foundations for successful cooperation from the outset of any project. That's the only way it is possible for us to proceed efficiently and avoid having to make time-consuming, expensive adjustments later.

For decades “made by BUTTING“ vessel solutions have been proving their worth in many areas. Customers from a large number of sectors have confidence in our engineering expertise and our traditional craftsmanship. For these and future customers we offer tailor-made, cost-effective package solutions of a quality which satisfies our customers' requirements.

BUTTING Anlagenbau: vessels, pipes and assembly – everything from a single source!

BUTTING – Progress by Tradition
